

Chicka Chicka Tree

Materials Needed: brown and green paper, scissors, letter stickers or small foam letters, glue

Just let the children cut the different shades of brown paper into pieces and glue onto larger paper to make a tree trunk.

Let them do the same with different shades of green for the leaves of the tree.

Help the children find the letters for their name and glue them on the tree (provide a name card with each of the students' name printed so they can try and find the letters themselves!).

VARIATION: Pre-cut the paper into the shape you are working on with your preschoolers. They can make their tree out of circle shaped brown and circle shaped green.

You might also want to let your children who are able cut them into shapes.
